

INFERENCE WITHOUT LIMITS

# ElastixAI Enables The Agent Economy

Instead of forcing models to conform to hardware, Elastix delivers 10X+ more tokens per dollar by making hardware conform to models.

Saman Naderiparizi  
Co-Founder and CTO

# Come see it in-action at our Booth

A screenshot of an AI chat interface. At the top left, it says 'elastix\_gptoss\_120b\_amd' with a dropdown arrow and a plus sign, and 'Set as default' below it. At the top right, there are three icons: a refresh icon, a list icon, and a profile icon. In the center, there is a circular icon with 'OI' and the text 'elastix\_gptoss\_120b\_amd'. Below this is a rounded rectangular box containing the text: 'Write a Python function that takes a list of numbers and returns the maximum, the minimum, and the average and store them in a .csv file'. At the bottom left of this box are a plus sign and a grid icon. At the bottom right are icons for a document, a microphone, and a send button (an upward arrow in a circle). Below the box, it says 'Open WebUI - v0.8.10'.

Open WebUI - v0.8.10

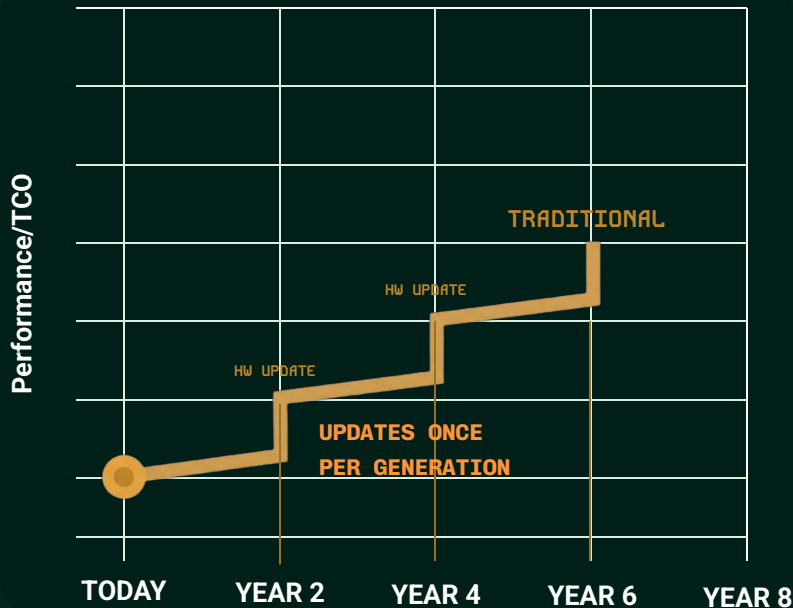

If you love your engineers, set them free

# ElastixAI: Fly Instead of Drive

Once every 1-2 years a custom silicon is updated, this is much slower than the pace of innovation in AI.

**This means any silicon is obsolete by the time it is out.**

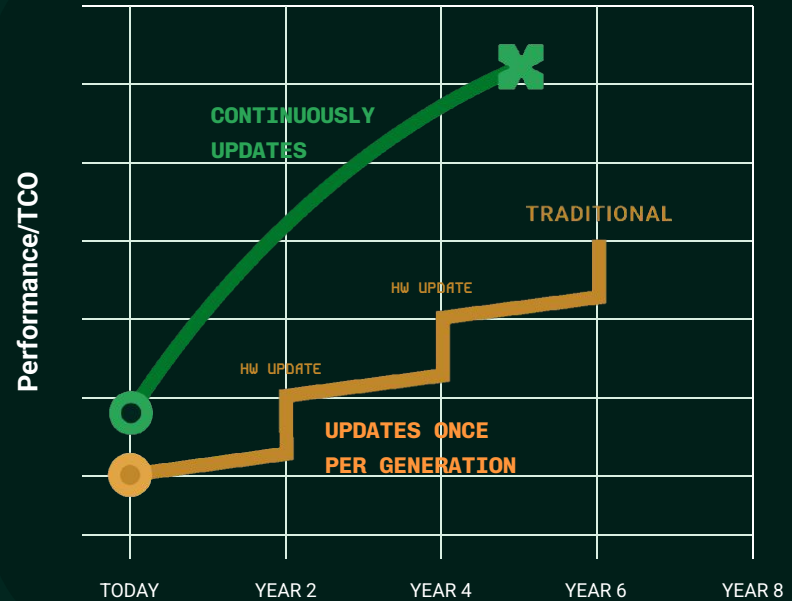

If you love your engineers, set them free

# ElastixAI: Fly Instead of Drive

ElastixAI has created an entirely new vector of optimization: continuous processor optimization. It's a new dimension for performance acceleration beyond just optimizing the model or buying the latest GPU.

**This is Hardware confirming to AI and not the other way around.**
